

21st International Project Week 2019
20th – 24th May 2019

Lecturer: Eeva-Mari Miettinen

University/Company: TAMPEREEN AMMATTIKORKEAKOULU

Country: Finland

Digital social work and competences

Content:

In this project we explore the possibilities and challenges of digital social work. We get to know some different apps that we use in Finland. In the workshop the students discuss and reflect the competencies needed in eSocial Work. One important perspective is to understand the social impacts that digitalization has on people. We learn technical solutions for different challenges in the 21st century. Another objective is to understand also the inequalities in the society caused by digitalization. Finland is one of the leading countries in both wellbeing and digitalization but we do have people in marginal without the possibilities equipments and skills needed in contemporary world.

Methods:

- workshop, small group work
- demo: digital apps in client work
- action-based learning

Competences and skills to be acquired:

- digital social work as a concept
- competencies in e Social Work
- ethics in eSocial work

Prerequisites:

Students should have smartphones or tablet PCs
