

21st International Project Week 2019
20th – 24th May 2019

Lecturer: Robert Larson

University/Company: The College of St. Scholastica

Country: USA

Digital Media Theory & Practice

Content:

This course introduces students to the field of Communication and Media Studies and its application to philosophy, educational research, social engagement, and the digital representation of world. Through intentional examination and construction of digital media, students analyze the relationship between media and society.

The students will explore the Dimensions of Postmodern Media Architecture and construction of Theoretical and Applied Communication by Technical Means.

Methods:

Lecture, Philosophical Inquiry, Hands-on Lab and instruction using digital cameras and audio-recording equipment

Competences and skills to be acquired:

The course begins with the establishment of a media theory, a philosophical framework that leads to an intentional, practical construction of new media by technical means. The course is a melding of philosophical principle, educational research, and the practical, hands-on application of media technology.

Prerequisites:

none

Language of instruction:

English

Recommended for:

Interdisziplinär
