**Country:** Germany

---

### **Ultimate Challenge: Climate Change vs. Climate Action**

#### **Content:**

The questions of energy crisis and climate change can only be answered by active people from science and the community. In the project, different short- and long-term scenarios are defined from the perspective of students of economics, social sciences and engineering.

#### **Methods:**

- workshops
- discussion sessions
- calculations and interpretations
- interim presentation
- reflections

#### **Competences and skills to be acquired:**

- open approach to actual problems
- interdisciplinary work
- no specific knowledge

#### **Prerequisites:**

None.

#### **Language of instruction:**

English
